

We are EVIM Bildung gGmbH

The non-profit EVIM Bildung supports children and young people with a variety of educational and care services that allow them to independently and confidently shape their lives and actively participate in our society.

EVIM Bildung gGMBH is a subsidiary of EVIM, the protestant association for home missions in Nassau. On the strength of an over 160 year tradition, EVIM supports people through senior citizen assistance, disability assistance, youth welfare, education and service. Our motto is, "We are where people need us."

We would like to meet you.

Want to know more about our school? We warmly invite you to schedule an interview, tour, or evaluation. Please do not hesitate to contact us. We would be pleased to meet you and your child!

EVIM Bildung | Lower Secondary Education
Campus Klarenthal

*Living and
learning together*

Photos: Rui Camillo, Thomas Lohne

Informed by ideas and practices of Progressive Education, the Lower Secondary Education (Sekundarstufe I) at Campus Klarenthal is part of an educational opportunity for all children and young people from preschool through high school. We offer every qualified degree provided by the German educational system.

Our most important goal is to help each individual child and each youth to lead an independent and responsible life.

Learning by Experience

In grades 5 to 10 we continue the process of self-organized learning we introduce in primary school. Young people need encouragement and practice to confront challenges, to think and explore new opportunities. Expert tutoring not only helps to turn curiosity into interest and questions into research, but also assures that findings are compared, classified, evaluated and presented in appropriate modes. Students document their progress in learning and their individual talents in a portfolio.

All classes consist of small groups which are supervised by two educators.

Learning needs Motivation

We respect individually different rhythms and ways of learning and adjust our lessons to them. We offer occasions to be curious about the mysteries of things, the rules under which they operate, but also to be curious about each other. By exchanging views with others, experiences in the mode of trial and error turn into knowledge. The sophisticated spatial concept of our school creates a suitable environment for different ways of engaging with topics of learning – solitary, concentrated individual work can take place right next door to group cooperation.

Every school day begins flexibly between 7:30 and 8:30 a.m. Mandatory classes are taught between 8:30 a.m. and 4:30 p.m. After that, through 6 p.m. and on Fridays to 4 p.m., there is a variety of optional, expertly guided classes to choose from.

Science, Languages, Culture

We place great emphasis on both, scientific as well as cultural education. Bilingual classes taught by native speakers promote the joy of learning foreign languages. Professional artists work with the children on theater, dance, art and music projects. School band, the school music ensemble, choir and theater groups regularly present performances at our well-equipped auditorium. The teaching of media literacy by professionally guided film and computer projects plays an important role.

Learning in workshops - learning from practitioners

Topics like metal, herbalism, cooking, woodworking and others are offered as workshops on the school grounds. They are taught by professionals from the respective fields who convey their knowledge and provide hands-on instruction. Our school is also well connected with external partners. Internships in companies and institutions are as much a part of school education as research weeks, excursions or theater visits.

Spacious School Campus immersed in Nature

Exercise and sports are naturally integrated into the school life: football, judo, forest runs, horse-back riding and more. The school is located in a pleasant environment surrounded by nature. Located at the edge of the woods, it is nevertheless easily reached by bicycle or bus. The generously proportioned, spacious school grounds and the unique location offer our students an exceptional amount of space in a relaxing, tranquil and natural environment.
